Figure 1 consists of 11 bar charts, labeled (a) through (k), each representing a different demographic or attitudinal variable. Each chart compares the percentage of respondents in each category for the 1992 and 1996 elections. The y-axis for all charts represents the percentage of respondents, ranging from 0 to 100. The x-axis for each chart lists the categories for that variable.

- (a) Age:** Categories are 18-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75-84, 85+. The 1996 election shows a higher percentage of respondents in the 18-24 and 25-34 age groups compared to 1992.
- (b) Sex:** Categories are Male and Female. The percentages are relatively stable between 1992 and 1996.
- (c) Education:** Categories are Less than high school, High school, Some college, College, Graduate school. The 1996 election shows a higher percentage of respondents with a college or graduate degree.
- (d) Income:** Categories are Less than \$10,000, \$10,000-\$19,999, \$20,000-\$29,999, \$30,000-\$39,999, \$40,000-\$49,999, \$50,000-\$59,999, \$60,000-\$69,999, \$70,000-\$79,999, \$80,000-\$89,999, \$90,000-\$99,999, \$100,000+. The 1996 election shows a higher percentage of respondents in the higher income brackets.
- (e) Employment:** Categories are Not employed, Part-time, Full-time. The 1996 election shows a higher percentage of respondents who are full-time employed.
- (f) Home ownership:** Categories are Do not own, Own. The 1996 election shows a higher percentage of respondents who own their home.
- (g) Political affiliation:** Categories are Democrat, Republican, Independent. The 1996 election shows a higher percentage of respondents who are Democrats.
- (h) Party affiliation:** Categories are Democrat, Republican, Independent. The 1996 election shows a higher percentage of respondents who are Democrats.
- (i) Party identification:** Categories are Democrat, Republican, Independent. The 1996 election shows a higher percentage of respondents who are Democrats.
- (j) Party loyalty:** Categories are Democrat, Republican, Independent. The 1996 election shows a higher percentage of respondents who are Democrats.
- (k) Party support:** Categories are Democrat, Republican, Independent. The 1996 election shows a higher percentage of respondents who are Democrats.

Figure 1 consists of 11 bar charts, labeled (a) through (k), each representing a different demographic or attitudinal variable. Each chart compares the percentage of respondents in each category for the 1992 and 1996 elections. The variables are: (a) Age, (b) Sex, (c) Education, (d) Income, (e) Employment, (f) Home ownership, (g) Political affiliation, (h) Party affiliation, (i) Party identification, (j) Party loyalty, and (k) Party preference. The charts show that while the overall distribution of respondents remained relatively stable between 1992 and 1996, there were notable shifts in certain categories, such as the increase in the percentage of respondents identifying as Democrats in 1996 compared to 1992.

Figure 1 consists of 11 bar charts, labeled (a) through (k), each representing a different demographic or attitudinal variable. The y-axis for all charts is 'Percentage of respondents' (0-100%). The x-axis for each chart has two categories: 'Total population' and 'Sample'. The data is as follows:

Variable	Total population (%)	Sample (%)
a) Age	18-24: 15, 25-34: 25, 35-44: 25, 45-54: 20, 55-64: 10, 65+: 5	18-24: 15, 25-34: 25, 35-44: 25, 45-54: 20, 55-64: 10, 65+: 5

Figure 1 consists of 11 bar charts, each representing a different variable. The x-axis for all charts lists four groups: All respondents, Nonusers, Users, and Users with a high degree of use. The y-axis represents the percentage of respondents, ranging from 0% to 100%.

- Age:** Shows a distribution across age groups (18-24, 25-34, 35-44, 45-54, 55-64, 65+).
- Sex:** Compares the percentage of males and females.
- Education:** Shows percentages for different education levels (High school or less, Some college, Bachelor's, Master's, Doctorate).
- Income:** Shows percentages for different income brackets.
- Marital status:** Shows percentages for different marital statuses (Single, Married, Divorced, Widowed).
- Employment status:** Shows percentages for different employment statuses (Full-time, Part-time, Unemployed, Retired).
- Health status:** Shows percentages for different health statuses (Excellent, Good, Fair, Poor).
- Attitude toward computers:** Shows percentages for different attitudes (Very positive, Positive, Neutral, Negative, Very negative).
- Attitude toward the Internet:** Shows percentages for different attitudes (Very positive, Positive, Neutral, Negative, Very negative).
- Attitude toward the Internet for business:** Shows percentages for different attitudes (Very positive, Positive, Neutral, Negative, Very negative).
- Attitude toward the Internet for personal use:** Shows percentages for different attitudes (Very positive, Positive, Neutral, Negative, Very negative).

Figure 1 consists of 11 bar charts, each representing a different variable. The x-axis for all charts is divided into four categories: All respondents, Nonusers, Users, and Users with a high level of use. The y-axis represents the percentage of respondents, ranging from 0 to 100. The variables are: Age (with sub-categories 18-24, 25-34, 35-44, 45-54, 55-64, 65+), Sex (Male, Female), Education (High school or less, Some college, Bachelor's degree, Graduate degree), Income (Less than \$10,000, \$10,000-\$19,999, \$20,000-\$29,999, \$30,000-\$39,999, \$40,000-\$49,999, \$50,000-\$59,999, \$60,000-\$69,999, \$70,000-\$79,999, \$80,000-\$89,999, \$90,000-\$99,999, \$100,000+), Marital status (Single, Married, Divorced, Widowed), Religion (Protestant, Catholic, Jewish, Muslim, Other), Political affiliation (Democrat, Republican, Independent), Attitude toward the environment (Strongly agree, Agree, Disagree, Strongly disagree), Attitude toward the government (Strongly agree, Agree, Disagree, Strongly disagree), Attitude toward the military (Strongly agree, Agree, Disagree, Strongly disagree), Attitude toward the police (Strongly agree, Agree, Disagree, Strongly disagree), and Attitude toward the police (Strongly agree, Agree, Disagree, Strongly disagree).

Figure 1 consists of 11 bar charts, each representing a different variable. The x-axis for all charts lists four groups: All respondents, Nonusers, Users, and Users who have used the program for 1 year or more. The y-axis represents the percentage of respondents, ranging from 0% to 100%.

- Age:** The distribution is relatively even across groups, with a slight peak in the 'All respondents' group.
- Sex:** The distribution is relatively even across groups, with a slight peak in the 'All respondents' group.
- Education:** The 'Users' group has a significantly higher percentage of respondents with a college degree or higher compared to the other groups.
- Income:** The 'Users' group has a significantly higher percentage of respondents in the higher income brackets compared to the other groups.
- Marital status:** The distribution is relatively even across groups, with a slight peak in the 'All respondents' group.
- Employment status:** The 'Users' group has a significantly higher percentage of respondents who are employed compared to the other groups.
- Health status:** The distribution is relatively even across groups, with a slight peak in the 'All respondents' group.
- Attitude toward computers:** The 'Users' group has a significantly higher percentage of respondents with a positive attitude toward computers compared to the other groups.
- Attitude toward the program:** The 'Users' group has a significantly higher percentage of respondents with a positive attitude toward the program compared to the other groups.
- Attitude toward the program's usefulness:** The 'Users' group has a significantly higher percentage of respondents who find the program useful compared to the other groups.
- Attitude toward the program's ease of use:** The 'Users' group has a significantly higher percentage of respondents who find the program easy to use compared to the other groups.

Figure 1 consists of 11 bar charts, labeled (a) through (k), each representing a different demographic or attitudinal variable. Each chart compares the percentage of respondents for that variable between gay men (n=100) and gay women (n=100). The y-axis for all charts represents the percentage of respondents, ranging from 0% to 100%.

- (a) Age:** The x-axis shows age groups: 18-24, 25-34, 35-44, 45-54, 55-64, 65-74, and 75+. Gay men show a higher percentage in the 18-24 group, while gay women show a higher percentage in the 25-34 group.
- (b) Sex:** The x-axis shows Male and Female. Gay men are 100% male, and gay women are 100% female.
- (c) Education:** The x-axis shows Less than high school, High school, Some college, College, and Graduate. Gay men have a higher percentage of college and graduate degrees, while gay women have a higher percentage of high school and some college education.
- (d) Income:** The x-axis shows income brackets: Less than \$10,000, \$10,000-\$19,999, \$20,000-\$29,999, \$30,000-\$39,999, \$40,000-\$49,999, \$50,000-\$59,999, \$60,000-\$69,999, \$70,000-\$79,999, \$80,000-\$89,999, \$90,000-\$99,999, and \$100,000+. Gay men have a higher percentage in the \$100,000+ bracket, while gay women have a higher percentage in the \$20,000-\$29,999 bracket.
- (e) Employment:** The x-axis shows Employment status: Not employed, Part-time, Full-time. Gay men have a higher percentage of full-time employment, while gay women have a higher percentage of part-time employment.
- (f) Home ownership:** The x-axis shows Home ownership: Own, Rent. Gay men have a higher percentage of home ownership, while gay women have a higher percentage of renting.
- (g) Marital status:** The x-axis shows Marital status: Single, Married, Divorced, Widowed. Gay men have a higher percentage of being single, while gay women have a higher percentage of being married.
- (h) Political affiliation:** The x-axis shows Political affiliation: Democrat, Republican, Independent. Gay men have a higher percentage of being Democrats, while gay women have a higher percentage of being Republicans.
- (i) Party affiliation:** The x-axis shows Party affiliation: Democrat, Republican, Independent. Gay men have a higher percentage of being Democrats, while gay women have a higher percentage of being Republicans.
- (j) Attitude towards gay men:** The x-axis shows Attitude: Strongly oppose, Oppose, Neutral, Support, Strongly support. Gay men have a higher percentage of strong support, while gay women have a higher percentage of opposition.
- (k) Attitude towards gay women:** The x-axis shows Attitude: Strongly oppose, Oppose, Neutral, Support, Strongly support. Gay men have a higher percentage of strong support, while gay women have a higher percentage of opposition.
